## WELCOME:

We welcome new customers to Vision Pickling & Processing and QC Metal Pickling! Your business is important to us. We make every effort to treat each customer equally and will do everything in our power to accommodate all reasonable requests. Proper written communication on your purchase orders will ensure your requests will be met in a timely manner. We notify each customer when their material is ready for pickup so they can schedule the transportation arrangements. **We take great pride in offering the best quality and service in the industry.** It is our hope that this is the beginning of a long term business relationship which will be mutually beneficial to both companies.

## ALL PARTS SEGREGATED

## SERVICE:

Prompt reliable service with a normal **three-day turn around** is our specialty. Our **“One Stop Shop”** offers tremendous transportation and overhead cost savings. Pickling, Saw Cutting, and J.I.T. Inventory on all your material requirements are under one control, at one plant. Our reputation is built upon superior service. We have shown proven performance since 1982, with **two plants operating in the Midwest**, we have established our dependability to meet your production schedules. Our QC Metal Pickling plant is located in East Moline, IL along the Mississippi River, serving our customers to the West, while Vision Pickling & Processing serves our customers to the North and East.

## PROCESSING AREA

## QUALITY:

We can pickle and oil from the smallest parts to as large as 48” x 96” x 42 feet. All parts are individually separated and neutralized before oil or synthetic submersion. **We do not bundle dunk.** Our proprietary oil and synthetic rust preventative are formulated to an exacting standard to yield a high cosmetic surface and ease all types of steel fabrication. Each piece is 100% coated. A unique system of monitoring our chemical process enables us to ensure the quality of **consistent coverage and rust protection.** **Sample bundles or pieces can be processed** at no charge to demonstrate the advantages of pickling which enhance both quality and production.

We offer **bundle cutting** for a wide range of material. Our saw capacity is 27” x 20” x 40”. For more information, inquire at Vision.

## STORAGE

# Batch Pickling

## Cost Effective Advantages

- ☐ **Pickling vs. Shotblasting**  
Pickling provides a cleaner and smoother surface to provide a better quality paint application and appearance.
- ☐ **Superior Surface Application for E-Coat and Powder Coat Paint Systems**
- ☐ **Greater Marketability for Hot Roll**  
We pickle Flats, Tubing, Structurals, Sheets, Plates and various Fabricated Parts.
- ☐ **Clean Surface Cosmetic Consistency**  
Scale and Rust Free Base Metal ready for paint, fabrication, plating, etc.
- ☐ **Salvage Steel**  
Secondary steel due to rust can now be reclaimed to near prime condition.
- ☐ **Weldability**  
No flashing or “hot spots” from our special process.
- ☐ **Lower Tooling Cost**  
Extends cutting tool life due to scale and rust free material. Better handling due to cleaned and oiled surface.
- ☐ **Extended Shelf Life**  
Enables stored inventory for your customer’s convenience.

**Call us now for all your pickling needs and compare our competitive prices and outstanding service!**
